SUMMARY

Applied Computing (FinTech) undergraduate at SIT who ships full-stack products and understands the finance behind them: portfolio theory, derivatives, and MAS regulation. Seeking a 1-year fintech internship (IWSP) starting 3rd May 2027 to 7th April 2028.

EDUCATION

Singapore Institute of Technology (SIT) 2025 – 2028 (expected)

B.Sc. Applied Computing (FinTech)

- Relevant modules: Database Systems, Cloud Computing & Big Data, Introduction to Software Engineering, Fintech Investment & Risk Management, Design Innovation

Nanyang Polytechnic

2022 – 2025

Diploma in Infocom & Media Engineering

- Director's List, AY2024/25 Semester 1; DIME Good Progress in Academic Performance, AY2022 Semester 2

WORK EXPERIENCE

Intern | AIA

4 May – 7 Aug 2026

- Built a CRM-style web system for an insurance agent to manage clients, leads, tasks, policies and service cases
- Designed the user interface and connected it to the backend data, so agents can view and update live records
- Agents saving time and producing high efficiency in their planning

Intern | Trakomatic

2024

- Performed system testing and troubleshooting to keep Trakomatic solutions running reliably
- Configured hardware and software components for deployment at client sites, and monitored system performance
- Wrote technical reports and documentation to support project updates and client requirements

TECHNICAL PROJECTS

Hawker / Food Centre App | INF2003 Database Systems

2026

- Frontend lead on a team app built on both a relational and a non-relational database, designed to be clear and usable for elderly diners
- Built login and diner browse flows wired to live centre and stall data, with loading states instead of placeholder content; defined the API fields the browse screen needs with backend teammates

Event Ticketing Web System | PHP, MySQL, JavaScript, SVG

2026

- Redesigned the UI into a clean, minimalist brand with a new colour scheme, custom logo and dynamic homepage carousel
- Built a category filter bar (Concert, Comedy, etc.) that updates without page refresh, using prepared statements against SQL injection, JSON responses and indexes on category and event date
- Hand-coded an interactive SVG seat map (17 zones) with focus mode, a consecutive-seat algorithm that keeps groups together, and a 6-seat cap; live MySQL pricing and sold-out status prevent overbooking

Enterprise Network Design & Security | Cisco IOS, VLANs, ACLs, Windows Server (NYP)

2024

- Team of two: configured a segmented network with Marketing, Finance and IT VLANs on /27 subnets, with static and default routes between the ISP and NYP routers
- Set up DNS, DHCP, HTTP and RDP on Windows Server, with PCs joining the domain
- Wrote extended ACLs per VLAN for HTTPS, RDP and SFTP (IT can remote into Marketing but not Finance); fixed a routing gap to the ISP loopback and an ACL that broke DHCP

VMware vSphere Virtual Infrastructure | vCenter, ESXi, vMotion, HA, DRS

2024

- Deployed vCenter, a datacentre, content library and VM template; configured vMotion across two ESXi hosts, with HA and DRS verified by shutting down a host
- Created a CPU alarm (above 90%) that restarts the VM, validated with a load-test script; compared Hyper-V and Red Hat Virtualization on features, scalability, licensing and cloud integration

LEADERSHIP & EXPERIENCE

Vice President, Engagement & Safety | AC (FinTech) Student Management Committee, SIT

2026 – Present

- Plan and run events for a 390-student Applied Computing (FinTech) cohort, working with a 10-member committee
- Bridge communication between students, seniors and faculty; ensure every committee event runs safely and smoothly
- Organising SIT Safety Fair 2026: securing sponsors, coordinating logistics, and keeping content educational

SITizen Ambassador | Communications Team, SIT

2026 – Present

- Represent SIT at school events and outreach activities; support campus initiatives that raise student engagement

Assistant Logistics Head | Inter-Cluster Games, SIT

2026

- Planned venue, equipment and schedule logistics for 600+ participants

SKILLS & CERTIFICATIONS

Technical: Python, PHP, JavaScript/React, Next.js, SQL and NoSQL databases, Prisma, Supabase, Tailwind CSS, Git, AWS, Linux/Ubuntu, VMware ESXi, Cisco IOS

Finance: Portfolio theory, bond pricing, DDM, derivatives (options, swaps, structured products), ETF investing

Regulatory: MAS notices, AML/CFT, Fair Dealing Guidelines, Securities and Futures Act

Certifications: CMFAS RES5
